**Provincial Health
Services Authority**
Province-wide solutions.
Better health.

BC Women's Hospital & Health Centre (BCW) is the only facility in British Columbia devoted primarily to the health of women, newborns and families. It provides a broad range of specialized women's health services that address the health needs of women of all ages and backgrounds. BC Women's is one of the largest maternity facilities in Canada, with over 7,500 births in 2005/6, and is both the major primary and secondary maternity services provider in the Lower Mainland and the cornerstone of the provincial tertiary care system. As an academic health centre BCW's mandate includes providing strong leadership in research and the education and professional development of health care professionals in areas related to the health of the populations we serve.

BC Children's Hospital (BCCH) cares for the province's most acutely ill or injured children and youth, provides developmental and rehabilitation services to children and youth throughout BC, and offers a broad range of health services. Sunny Hill Health Centre for Children (SHHC), a leading provincial facility offering specialized services to children and youth with developmental disabilities from birth to age 19, works collaboratively with BCCH. SHHC focuses on the child and their family while supporting health care professionals in their community. BCCH also operates a wide number of specialized health programs, is a leading acute care teaching facility, and conducts research to advance health and care through the Child and Family Research Institute and in partnership with the University of British Columbia.

BCW and BCCH are agencies of the **Provincial Health Services Authority (PHSA)** which plans, manages and evaluates specialty and province-wide health care services across BC. PHSA embodies values that reflect a commitment to excellence. *These include: Patients first • Best value • Results matter • Excellence through knowledge • Open to possibilities.*

Audiologist Cochlear Implant Services

Reference # 37840

Regular Full-Time

Salary Range: \$32.69 to \$40.78 per hour

4500 Oak Street, Vancouver, British Columbia

This position is part of an interdisciplinary team including a surgeon, social worker, and psychologist. Consistent with the inter-professional setting and the mission, vision and strategic direction of PHSA and BC Children's Hospital, the Cochlear Implant Audiologist (CI Audiologist) provides candidacy assessment, intra-operative monitoring, post-implantation monitoring and follow-up services to patients and families. The CI Audiologist provides information to team members and relevant community agencies regarding the continuum of service. The CI audiologist services include assessment, treatment/monitoring, consultation, reporting, advocacy, liaison with community agencies, development of educational/training resources, program planning and research.

Qualifications

Education, Training & Experience

- Master's Degree in Audiology from a recognized program.
- Minimum of two (2) years recent and relevant Post Masters clinical experience specifically providing cochlear implant audiology services including a minimum of one (1) year of extensive experience performing pediatric cochlear implant audiology services within an interdisciplinary team environment.
- Current certification of Registration as an Audiologist in the College of Speech and Hearing Health Professionals of BC.
- Current Advanced Competency Certification in Cochlear Implant Management from the College of Speech and Hearing Health Professionals of BC.

Example of Skills and Abilities

- Comprehensive knowledge of the field of paediatric audiology, cochlear implantation, current implant devices and technology, programming devices, and auditory development.
- Comprehensive knowledge of pediatric audiology assessment (infants, young children and complex cases) as it relates to cochlear implantation.
- Knowledge of research methodology and processes.
- Demonstrated ability to work collaboratively and effectively in an inter-professional environment.
- Demonstrated ability to communicate both verbally and in writing.
- Demonstrated ability to explain technical information/results to individuals with varying levels of understanding.
