

Tinnitus & Hyperacusis Therapy Intensive Master Class

10-12 August 2016, Melbourne

*Intensive specialist course for tinnitus and hyperacusis
rehabilitation*

Keynote Speaker
Professor Richard S. Tyler
The University of Iowa, USA

Course Tutor
Dr. Hashir Aazh
Royal Surrey Hospital, UK

- This intensive course is carefully designed to include all the core topics relevant to tinnitus and hyperacusis rehabilitation.
- Practical training on application of specialist audiologist-led cognitive behavioural therapy focused on tinnitus and hyperacusis.
- How to distinguish tinnitus/hyperacusis-related distress from a distress caused by other psychological disturbances in a person who also have tinnitus/hyperacusis.
- Audiological rehabilitative interventions including the use of combination devices and hearing aids.

Venue: Melbourne Marriott, Melbourne VIC 3000, Australia

<http://tinnitustherapy.org.uk/Australia.html>

Key Topics:

- Assessment of tinnitus and hyperacusis
 - Tinnitus and hyperacusis rehabilitation in children and adults
 - Clinical implementation of structured audiologist-led Cognitive Behavioural Therapy in management of tinnitus and hyperacusis
 - Enhance patient-clinician relationship using Client-Centred Counselling skills
 - Design and delivery of Behavioural Experiments in an audiologist-led Tinnitus and Hyperacusis Rehabilitation Service
 - Manage complex cases with other psychiatric co-morbidities
 - Service development
- This intensive masterclass is designed for those who are keen to specialise in tinnitus and hyperacusis rehabilitation and includes many practical sessions.
 - Participants will be provided with the specialist skills, knowledge and tools which are essential for developing or expanding their Tinnitus service.
 - Participants will leave this practical course with a solid grounding in tinnitus and hyperacusis therapy that can be put into practice straight away.
 - At every stage of learning, theory will be constantly applied to practical examples.
