

Clinical (Vestibular) and Dispensing Audiologist (1.0) or Dispensing Audiologist (0.6)

The Centre for Advanced Hearing and Balance Testing at Toronto General Hospital is among the largest and most diverse outpatient audiology and specialty vestibular units in North America. Together with our full-service hearing aid dispensary, the Munk Hearing Centre, we work closely with a multidisciplinary team lead by Dr. John Rutka to deliver exceptional patient-centred hearing and vestibular healthcare for our patients.

Job Description

We are in the process of recruiting a full-time (1.0) audiologist who will split their time between our two centres. We are also inviting applications from those interested in a 0.6 dispensing opportunity at the Munk Hearing Centre (dispensing only). Please indicate your preference in your application.

This is a unique opportunity to practice many facets of audiology, including a full range of hearing and vestibular assessments and aural rehabilitation. If you are interested in having an exciting and challenging caseload while working in a unique clinical setting with state-of-the-art equipment and an incredible team of skilled professionals, we would like to hear from you.

Who We Are Looking For

The successful applicant should be an enthusiastic lifelong learner with a passion for audiological practice and the ability to work well in a team environment. They must be highly motivated, conscientious and reliable while also being compassionate and caring. They must also possess strong interpersonal, communication and organizational skills, along with problem solving and critical thinking skills. An ability to think outside-the-box and push the boundaries of practice would be an asset as we continue to grow and add services.

- Master's or Doctorate Degree in Audiology (*required*)
- Registered with CASLPO (*required*) and ADP (*preferred*)
- Experience with vestibular assessment and electrophysiology an asset
- Research skills an asset

Duties and Responsibilities

Include but are not limited to:

- Complete audiological assessments
- Aural rehabilitation including hearing aid evaluations, dispensing and all appropriate follow-up/counselling (including for medically complex/surgical cases)
- Cerumen management (bedside and under microscopy)
- Hearing tests for ENT clinic
- Full vestibular test battery (videonystagmography, video head impulse, cervical and ocular vestibular evoked myogenic potentials)
- Electrocochleography
- Neurological ABRs
- Cortical Evoked Potentials

Professional Responsibilities

- Collaboration in development of best practice guidelines
- Participation in educational activities, including occasional after-hours opportunities
- Supervision and mentorship of students

What We Offer

- Full-time weekday schedule (M-F, 8am-4pm) or 0.6 FTE
- 35 hours per week (1 hour lunch)
- Collaborative environment
- Clinical/research development opportunities
- Educational opportunities including neurotology rounds
- Training on vestibular and electrophysiological assessment as needed
- Freedom to choose all hearing aid manufacturers equally
- Patient-centred scheduling policies (i.e. more time for more challenging cases)
- Comprehensive benefits package, including extended health, dental and vision
- Flexibility with time off to promote work-life balance

While we operate within Toronto General Hospital, this is a non-union, non-UHN (University Health Network) position.

Application Details

Please send your resume with expression of interest to info@hearingandbalancecentre.ca. Only candidates selected for interviews will be contacted, though we thank all applicants for their interest in working with us. **The application deadline is December 31, 2022.** We are expecting to conduct interviews the week of January 16, 2023 for a projected start date of February 13, 2023.
