

Navigating Naturally in Noise: The Evolution of Directionality in Hearing Aids

FRIDAY, OCTOBER 13th - 11:05 AM

Hearing in noise is typically the #1 complaint of people with hearing loss, and it is also the #1 driver of satisfaction with hearing aids. For this reason, directionality is an area in the hearing aid industry that is continually evolving, with each iteration reflecting new knowledge in how to meet hearing aid users' needs more effectively and seamlessly. This course will explore groundbreaking research that has led to the directionality strategies which are used today, as well as the research guiding the industry to the directionality of tomorrow.

AGENDA

TIME - 11:05 AM - Live Presentation

LOCATION - CAA CONFERENCE 2023 - Delta Hotels Ottawa City Centre, Ottawa, ON

ROOM - Capital Room
