

CAA Sponsor Owned Talk

Step into the cutting-edge world of Artificial Intelligence in hearing healthcare with Victoria McLeod, M.Cl.Sc., as she leads this dynamic and engaging presentation. In just 45 minutes, you'll gain a transformative understanding of AI's role in modern hearing instruments and its potential to reshape our industry.

What you'll discover:

- **Demystifying AI:** Understand its current applications in hearing aids
- **Real-world impacts:** Explore adaptive environmental tuning, user preference learning, and advanced audio processing
- **Future horizons:** Preview upcoming innovations that will redefine patient care
- **Practice evolution:** Learn how AI advancements will enhance your clinical approach

Whether you're a newcomer or a veteran in the field, this talk promises to ignite your enthusiasm for the AI-driven future of hearing healthcare. Don't miss this opportunity to stay ahead of the curve and reimagine the possibilities for your practice and patients.
